OUR PORCELAIN WALL & FLOOR TILES ADVANTAGES

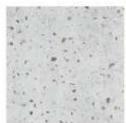

Durability: CDK porcelain tiles are durable, denser than standard deramic tiles. It is fired at higher temperature, made from refined clay. They last a lifetime if installed properly Moisture: CDK porcelain tiles are less prone to absorbing moisture due to its density. They are good in hot or cold climates.

Resistance to wear and tear: CDK porcelain tiles are hard wearing, resistant to stains, scratches, fading, chipping and do not crack easily.

Low Maintenance: CDK porcelain tiles are water resistant, clean easily with water and detergent. CDK porcelain tiles look great for years effortlessly with little maintenance

ARCHIBUILT EXPOSITION, 2021. The Built Environment and her Stakeholders

WELCOME ADDRESS

By Arc. Mobolaji Adeniyi, fnia

I am very pleased to welcome you all you to yet another Archibuilt exposition where we come together to discuss and learn about technologies, systems and policy issues that impact the building industry and the built environment at large. It is indeed a blessing for us all to gather for this year's Archibuilt. You are all welcome.

I am sure we will all remember 2020, especially with the things that came with it, but I am very glad that this year's exposition is already a reality. Let me use this time to remember and honour those we have lost in the past year in our industry home and abroad, we appreciate their contributions to making our industry grow.

Growth is very essential. The theme of this year's exposition - "The built Environment and her stakeholders" is not new knowledge. Let me say this year's theme is just giving us another clean slate to see from another dimension how stakeholders of the built environment can improve the built environment in a new way, something out of the usual and the norm.

The world-renowned celebrity and media mogul- Oprah Winfrey once said "We can't become what we need to be by remaining what we are". Which is why I am indeed happy that as professionals in the building industry we are beginning to see the need to increase the volume and involve celebrities in matters that concern the built environment, this is indeed a positive move towards growth, especially with the entertainment section that has been introduced in this year's exposition, the first of its kind. The section is titled "Celebrities and the Built Environment".

Celebrities are External or Normative Stakeholders of the built environment and with Nigeria putting herself on the world map especially in the entertainment industry- our movies now aired on international platforms like Netflix and our musicians now wining Grammy awards. We will be amazed at

the swift influence these great minds can have on the built environment if the necessary steps are taken. For example, their involvement in promoting clean and healthy environment, promoting the fight against improper waste disposal through ambassadorial deals.

The Client, Contractor, Designers, Sub-contractors, Local authorities, Politicians, End users among many others all have a role to play in improving the bult environment as stakeholders.

I believe that with the presence of top dignitaries in Government, top-notch professionals and minds in the construction sector and the built environment in this year's exposition, justice will be done to the various topics to be discussed.

There are several topics to be discussed in this year's exposition: "Celebrities and the built Environment", "Arts and Architecture", "Mitigating Risk: Effects on Client design and Cost" among many others.

We cannot afford to miss the trainings on product installation and specification writing, the entertainment with the talented celebrities we have this year, showcasing of the latest products in the building industry and so on.

I am sure this will be a very fulfilling exposition for us all. I enjoin each and every one, those that are here physically and those with us virtually to be ready to go on this interesting roller coaster. It promises to be educative.

I will not forget to congratulate to our new fellows. Congratulations!

I welcome you all once again,

Thank you.

SMAG ARS POLYSTYRENE NIGERIA LIMITED

Producers of Expanded Polystyrene Products

POLYSTYRENE FLOOR SLAB

ABOUTUS:

Smag ARS Polystyrene Nig. Ltd. is a quintessential polystyrene company reputed for excellence.

Smag ARS Polystyrene Nig. Ltd. is a wholly indigenous company with a dedicated and motivated workforce driven by innovation and excellence in a world in constant flux.

- EPS Block
- Naked Polystyrene
- Cornices
- Wall Panel
- Floor Slab
- Windowhoods
- Columns
- Pipe Insulations

WHY USE POLYSTYRENE?

- It Reduces Load Bearing And Ecological Damage
- Adapt To All Weather Conditions
- High Durability And Solid Panel Connection
- Rapid Assembly
- Easy To Move
- High Structural Capacity And Resistance To Natural Disasters
- Barriers Against Humidity
- Heat And Sound Proof

WHAT WE OFFER:

Anti-scratch strength.

A good TEMPERED glass film can withstand blades, scissors, keys and other hard, sharp objects above the ground scraping. ...

Smooth feel. ...

The size of the fit. ...

Anti-fingerprint and Anti-oil. ... Shatter-proof.

When it does break, tempered glass disperses into blunt, pebble-like pieces, rather than the sharp shards of traditional glass. The sharp pieces of regular broken glass can cause deep cuts and severe injury and are very difficult to clean up thoroughly

SILK AND SMOOTH SYSTEMS LIMITED

"Make it safe GLASS! TEMPER IT!!"

Tempered glass is used for its safety and strength in a variety of applications, including passenger vehicle windows, shower doors, aquariums, architectural glass doors and tables, refrigerator trays, mobile phone screen protectors, bulletproof glass components, diving masks, and plates and cookware.

NEW DAWN

IN HOME OWNERSHIP & HOUSING FINANCE

This is a mortgage facility to NHF contributors through Primary Mortgage Banks (PMBs), granted at 6% interest rate over a maximum tenor of 30 years.

A Contributor is expected to:

- · Choose a house of his choice anywhere in the country
- Contact a PMB to profile and package his loan to FMBN
- On receipt, FMBN will process, approve and pay for the cost of the house on his behalf

Home Renovation

This facility is granted to contributors for the renovation or improvement of their homes to deliver the desired functionality.

- Apply up to N1.0M
- Repay in 5 years
- Your employer will deduct from your salary and repay FMBN

Rent-to-Own Mortgage

With our Rent to Own mortgage, your rental payment over a period of time contributes towards the eventual ownership of the house.

- On any of our funded estates nationwide
- Apply via FMBN office nearest to you
- Payment is made monthly, quarterly or annually

Construction Finance

Our construction finance facilities help in bridging the housing deficit through mass production of houses. The facilities include:

Estate Development

Ministerial Pilot Housing Scheme (MPHS)

Cooperative Housing Development Loan

Any registered Cooperative can apply to build for its members

Individual Construction

· With valid title, C of O, designs and bills, we provide you loan to construct your house at any location in the country

...everyone deserves a home

GLASS MADE FOR MILESTONES

Sunlux - Stopray - Stopsol - Sunergy

Through the use of our solar control glazing, buildings become genuine "shining lights of design" that shape the architecture of a century. Whether they come with a hard- or softcoating, have high or low levels of reflection, have a subtle tint or state-of-the-art, silver-grey aesthetics: AGC's solar control coatings reduce the solar energy input whilst simultaneously offering maximum levels of daylight transmission and provide excellent thermal insulation.
